Course No. **25001**

CBRNE DETECTION EQUIPMENT AND TECHNIQUES (2-DAYS)

2 Day(s)

Time: 0730 - 1700

Focus: Current equipment, hazards, and sampling strategies for Chem Bio Radiological Nuclear and high Explosive (CBRNE) events are presented. The course will include both lectures and hands-on labs with military and equipment vendor personnel as the instructors.

Objective: Give personnel who are tasked with CBRNE response a basic understanding of CBRNE hazards, some of the equipment available on Navy bases and ships, how to do a CBRNE health risk assessment, and integrated sampling for first responders to CBRNE events.

Intended Audience: Military/civilian industrial hygiene and CBRNE response team personnel and their supervisors

INDUSTRIAL VENTILATION TESTING AND TROUBLESHOOTING (2-DAYS)

2 Day(s)

Time: 0800 - 1700

Focus: Course consists of lecture, example problems, videos and slide presentations. There is also a field trip on Sunday morning. A minimum background in algebra is required. A background in mechanical systems or industrial hygiene is helpful, but not necessary.

Objective: Identify the basic principles of industrial ventilation (IV) and IV system hardware. Examine checklists for design review and testing. Operate various test equipment in a field exercise.

Intended Audience: Industrial hygienists, safety personnel, engineers, and HVAC technicians involved in the testing and evaluation of industrial ventilation systems.

<u>Time</u>	<u>Topic</u>	<u>Speaker(s)</u>

ADVANCED ERGONOMICS METHODS (2-DAYS)

2 Day(s)

Time: 0800 - 1700

Focus: The course covers hand tool selection and vibration risk, workstation and task design, as well as industrial and computer workstation set-up and evaluation. The seminar will be balanced between lecture and interactive class exercises.

Objective: Describe ergonomic principles affecting the work environment. Explain how to assess ergonomic risk in the workplace by utilizing Ergonomic Survey Tools.

Intended Audience: Industrial Hygienists, Occupational Medicine Doctors, Occupational Health Nurses

Industrial Hygiene

Session No. **21003****INDUSTRIAL HYGIENE (III)**

1 Day(s)

Time: 0800 - 1140

Objective: Identify causes behind unexpected activation of a high pressure carbon dioxide fire suppression system; explain the limitations of material safety data sheets; describe the efforts to develop a long-term low-level passive air monitoring device for use in ambient air analysis; summarize hand/arm measurements during use of pavement breakers and whole-body vibration measurements on pilot seats; and outline the mechanics of the tools needed for mishap reduction goals.

<u>Time</u>	<u>Topic</u>	<u>Speaker(s)</u>
0800 - 0850	Consequences of an Unexpected Activation of a High Pressure Carbon Dioxide Fire Suppression System	CDR K. A. PARKER, MSC, USNR
0850 - 0915	Are We Evaluating The Right Exposures? Analysis of Material Safety Data Sheets for Accuracy of Hazardous Ingredient Disclosure	LCDR G. W. COOK, MSC, USN
0915 - 0940	Diffusion Badges as a Long-term, Low-level Method of Ambient Air Monitoring	MS K. A. PARKER
1000 - 1050	Vibration Exposure in the Navy	LT K. L. HARRER, MSC, USNR LCDR M. K. MAJAR, MSC, USN
1050 - 1140	Overview of SECDEF/DSOC 50% Mishap Reduction Goals and Objectives for Initiative Development - The Process and Winning the Funding!	CDR D. R. MILLS, MSC, USN
